

Rauf Ibna Rafiq

AI Automation Engineer · n8n Workflows · AI Agents · Applied AI

Mymensingh, Bangladesh · +880 1796 553402 · connect@rauf.pro.bd · linkedin.com/in/raufnir · github.com/raufnir

PROFESSIONAL SUMMARY

Automation engineer designing and shipping production n8n systems: AI sales agents, WhatsApp and Telegram bots, and document-processing pipelines built for real-world edge cases, not demos. Also builds custom AI applications on the Claude platform and GoHighLevel websites and funnels for local businesses. An electrical and electronic engineering background gives a solid quantitative foundation; daily work with LLMs, workflow orchestration, and vision AI is core to the job, not a novelty.

CORE COMPETENCIES

- **Automation & AI agents:** n8n workflow design, multi-agent architectures (conversational and verification agents), prompt engineering, tool-using AI workflows
- **Integrations:** WhatsApp Business API, Telegram Bot API, Gmail API, Google Sheets API, PostgreSQL, OpenRouter (Claude, GPT, Gemini)
- **Web & funnels:** GoHighLevel sub-accounts, funnels, landing pages, CRM automation, SMS/email sequences
- **Data & analysis:** Python, advanced Excel, SQL, high-volume data management
- **Documentation & training:** SOPs, build plans, technical write-ups, cohort-based tutoring

EXPERIENCE

Automation & AI Agent Engineer · Independent / Freelance · Ongoing

- Designed and shipped 4 production n8n automation systems spanning e-commerce risk routing, AI sales agents, document/vision AI pipelines, and WhatsApp/Telegram ordering bots
- Built idempotent, fail-closed systems with human-in-the-loop review and measurement loops that prove impact before claiming it

Annotation Labeler · RYU Data Center · March 2026 - Present

- Annotate computer-vision data across bounding box, lane classification, and transportation projects against detailed guidelines
- Catch and correct recurring labeling errors before they compound; coordinate with the team on guideline updates

AI Application Developer, Claude Platform · Independent / Freelance

- Built custom AI apps and internal tools for LLM, classification, and document-processing tasks, wired into n8n pipelines

GoHighLevel Website & Funnel Developer · Independent / Freelance

- Built and launched live business websites for HVAC, dental, and med-spa clients: landing pages, forms, appointment calendars, automated SMS/email sequences

Online Tutor & Tutorial Creator · Independent

- Taught 3+ cohorts in analytics and automation; produced SOPs and tutorial documents as core deliverables

IT & Accounting Operations Specialist · Dhaka

- 12-hour operational shifts maintaining complex client databases and financial reporting with zero data loss

Data & Operations Management · Talukdar Washing Plant

- Verified high-volume data flows and daily production reporting for accuracy

Industrial Trainee, Control Room · Ashuganj Power Station Co. Ltd.

- Monitored real-time system parameters and maintained critical data logs

EDUCATION & CERTIFICATIONS

- B.Sc. Electrical & Electronic Engineering, Hajee Mohammad Danesh Science & Technology University (HSTU)
- AI for Everyone, DeepLearning.AI
- Frictionless Sales & Inbound Lead Generation, HubSpot Academy
- Python Django (80 hours), EDGE ED Project, Bangladesh Computer Council
